

Nest Nook

Create a nest which can be woven with natural materials and ribbons and a frame for camping play (see images)

Active Play Zone

Large feature piece of play equipment and a set of swings with two bays of regular swings and one birds nest swing. Mulch surface to be used a sofffall with sofffall rubber at the base of the slide for high wear and under the birds nest swing to enable disability access. Rubber to continue as path through the play zone separating the two pieces of equipment with garden areas at edges to create some softening.

Entry

Stairs

Remove return of fire stairs to enable larger entry to playspace from school.

Retaining Wall

Weave 450mm retaining wall around play space to capture the change in level and create seating for students. Use a mix of stone and boulders.

Weaving Walls

Set up a nook with a series of weaving walls or screens for chalkboards etc and surround with garden bed to create an enclosed space for quiet play. Link to sand play by a series of sleeper and gravel steps

Cubby Play

Create a series of frames for cubby play and for weaving of natural materials for flexible play. Use old tree stumps as edging and tree sections for balancing play as edge to sand.

Vehicle Access

Allow a passage for vehicles between the church and the new playspace with lockable gates at the far end. For the topping up of mulch and sand and access to the playspace have a section of removable fence and a planter box which can be moved as required.

School Entry

Create a central avenue of trees through new gates to avoid root damage to services and building edges. Create a new set of gates with the new fence realignment with a feature paving threshold at the front, possible school emblem. Provide garden bed at edges to create a soft green transition in to the school
